Michael –

Attached are the Section 114 Information Requests for the two facilities. These are almost identical to the KCBX and SHB requests.

Hi Molly – Before AMAS can help, we need copies of the actual 114's to understand and evaluate what was required against what was submitted.

Michael Compher

**Subject:** Siting Plan

Michael –

I have received siting plans for BAM units at two more petcoke sites that I'm hoping to get assistance on. In particular, one of the sites is uniquely shaped and the locations of the proposed monitors appear to not be sited in the predominate wind directions. This is not my area of expertise, but it appears to me we should not accept it. One facility is in MN and the other is in WI. It is with the same company, C. Reiss.

Is there someone available to help with the PM10 continuous monitor siting plan approval? Eventually we'll have QAPPs to review too – but we're not there yet.

Thanks.

Molly Smith
